Head Lice

Head lice is very common in young children and they don't have anything to do with dirty hair. They are usually picked up from head-to-head contact.

Please continue to be vigilant and check your child's hair regularly.

Let the school know if you have found headlice.

Check:

- Your Child's hair once a week
- Use a proper detection comb to trap head lice
- If you find live lice, contact a pharmacist for treatment advice immediately
- If head lice are spotted, take a close look at the hair of all the family

Treat:

- Please treat your child with a clinically proven treatment
- Leave the treatment on for the recommended time for maximum effect
- Repeat the treatment for a second time seven days after the original treatment to kill any eggs that may hatch after the treatment
- Continue to check for head lice on a regular basis
